

N5. Steam Generator Pipe End Decon Saves Approximately 100 Person-Rem

Decontamination of steam generator hot and cold leg pipe ends saved an estimated 100 person-rem at Indian Point 3. In addition, hiring, training, and qualifying an additional 20 welders and potential schedule impacts were avoided.

For more, see "Steam Generator Hot/Cold Leg Reactor Coolant Pipe End Mechanical Decontamination," Gordon Dover, Norm Wilson, and Herman Operschall, Nucl. Plant J., September-October 1989, p. 70.
