

N52. HIGH-CAPACITY FILTERS

Pall (Europa House, Havant Street, Portsmouth PO1, 3PD, United Kingdom), a filter supplier, has introduced Profile II filters, with higher dirt capacity.

Profile II filters have an outer pre-filter section that captures large particles and prevents them from plugging the inner filter, where absolute filtration takes place.

For more, see Nuclear Engineering International, September 1990, p. 15, or contact Stan Osborn in the United Kingdom, +44(0)705 753545.
