

N78. SMALLER DOSIMETER

Dosimeter Corporation has developed Model 1888B, a new digital alarm dosimeter to update and improve its Model 1888A.

The Model 1888B is 25% smaller and weighs 50% less than the Model 1888A. The Model 1888B detects gamma and X-radiation in the range 0-9999 mR, with an accuracy rate of +/- 20% to 10 R/h for Cs-137.

For more, see Nuclear Engineering International, p. 17, January 1991, or contact Richard Terry at Dosimeter Corporation, 11286 Grooms Road, Cincinnati, Ohio 45242, U.S.A., (513) 489-8100.
