

N79. PORTABLE TEST BENCH FOR SNUBBERS, PUMPS, AND STEAM GENERATORS

To check the correct operation of hydraulic snubbers in reactor coolant pumps and steam generators without removing them, Framatome has developed Testan, a portable test bench, in partnership with the American company Enertech.

Testan has been used for a series of functional tests at Cruas 2 in France.

For more, see Nuclear Engineering International, p. 17, January 1991, or contact Elisabeth Goubet at Framatome, Tour Fiat, Cedex 16, Paris La Defense, France, +33 1 4796 5373.
