

N132. Worker Training And Responsibility

Canadian experience indicates that the most effective way of involving workers in any safety program is to make the workers responsible for their own protection. Four levels of training and related worker responsibilities at Ontario Hydro are described and discussed. The Ontario Hydro experience indicates that the worker training in radiation protection has resulted in significant dose reduction.

Taken From: "Ways to Involve Workers in Radiation Protection," A.H. Khan (Ontario Hydro, 757 McKey Road, Pickering, Ontario L1W 3C8, Canada). Presented at the Workshop on Work Management and Occupational Dose Control, OECD Nuclear Energy Agency, Paris, France, February 4-6, 1992.
