

N224. BWR Chemistry Guidelines Revision Committee Being Formed

Invitations have been sent from EPRI to utility managers for nominations to serve on an industry committee to revise the "BWR Normal Water Chemistry Guidelines." In previous committee discussions, both chemistry and radiation control issues have typically been the major concerns which must be addressed by the authoring committee. The first meeting of the committee is scheduled for February 24, 1993 in Palo Alto, California, the day prior to the start of the EPRI 1993 BWR Plan Chemists' Meeting. For more information regarding committee development or to suggest topics that you believe should be addressed by the committee, please contact Chris Wood at (415) 855 2379.
