

### **3451. A RADIATION PROTECTION APPROACH TO THE IMPLEMENTATION OF WORK MANAGEMENT**

The paper covers general principles for work management, with the aim to reduce exposures. Good work management will result in improved efficiency, reduction in downtime, improved economy and quality. The presentation also covers the necessity to collect detailed information and to use your own experience, as well as the experience from other plants, in order to have a continuous improvement and gradually lower exposures. The paper includes a number of examples, illustrating the principles, from more than 20 years of operation, of the Ringhals site.

*Presented at the 1997 International ALARA Symposium, Orlando, FL, March 16-19, 1997, by Krister Egner, Vattenfall AB, SWEDEN.*
