

N3461. Property Damage Risk Assessment Scoping Study

At the request of the South Texas Project Electric Generating Station (STPEGS), EPRI assessed the financial risks of on-site property damage from component failures and accidents and the effectiveness of available insurance in mitigating such risks. This report quantifies the risks of nuclear and nonnuclear accidents and the resulting property damage incurred. The report is a companion document to EPRI's *Nuclear Property Insurance Study* (TR-108061), which discusses five options for alternate insurance coverage.

For more information see: EPRI TR-108261, July 1997, 152 pages.
