

## 27.2 High-Dose Jobs in BWRs

High Dose Item	91	92	93	94	Avg. Dose
1. Reactor Assembly/Disassembly					
2. Fuel Shuffle/Slipping and Inspection					
3. CRD Removal/Rebuild, and Replacement					
4. Recirculation Pump Seal Replacement					
5. Main Steam Isolation Valve Repair and Inspection					
6. Safety Valve Repair and Inspection					
7. Primary Valve Maintenance and Repair					
8. In-Service Inspection					
9. Jet Pump Inspection and Repair					
10. Insulation Removal/Replacement					
11. Instrumentation Repair and Calibration					
12. Scaffold Installation/Removal					
13. Local Leak Rate Test					
14. Torus Repair, Inspection, and Modification					
15. Residual Heat Removal System Repair and Maintenance					
16. Snubber Inspection and Repair					
17. Reactor Water Cleanup System Repair and Maintenance					
18. TIP/SRM/IRM or PRM Calibration, Repair, and Maintenance					
19. Turbine Overhaul and Repair					
20. Condensate Pump Repair and Maintenance					
21. Refueling Pool Decontamination					
22. Plant Decontamination and Shielding					
23. Radwaste Systems Repair, Operation, and Maintenance					
24. Operations - Surveillance and Inspection					
25. Operations - Valve Lineups					
26. Seismic Inspection and Repair					
27. Desludging of Tanks, Sumps, and Drains					
28. Cavity Filter Changeout
