

## **D12. GRAND JUNCTION PRODUCES ENVIRONMENTAL CLEANUP DIRECTORY**

A new reference tool produced by the Grand Junction Projects Office can help DOE sites and government agencies identify environmental-cleanup firms that provide remedies for remediation problem.

The Commercial Environmental Cleanup - The Products and Services Directory features 325 companies worldwide. The 471 products and services are organized according to the problems they address within three categories: characterization, treatment and extraction/delivery/materials handling.

The directory supports the recommendation of the Environmental Management Advisory Board.
