

D22. TRANSATLANTIC PARTNERSHIP

The recently formed partnership of Parjarito Scientific Corporation (USA) and the UK's BNFL Instruments Ltd, two wholly owned subsidiaries of the BNFL Group, has provided sensitive nuclear waste assay systems for an advanced treatment facility for low level waste recently commissioned by BNFL's Sellafield plant. To achieve its fullest potential, the waste monitoring and compaction plant depends on the availability of these systems.

For more, "Transatlantic Partnership," pg.12, Nuclear Plant Journal, January-February 1996.
