

D39. LLW MANAGEMENT INFORMATION IS AVAILABLE ON THE WEB

The National Low-Level Waste Management Program at the Idaho National Engineering Laboratory is making a modified version of its Low-Level Radioactive Waste Document Information System through the program's home page at <<http://www.asksam.com/radwaste>>.

The document information system allows users to search library-type records on more than 1200 publications from the Nuclear Regulatory Commission, states and compacts, and INEL's National LLW Management Program.

This internet version of the system is a scaled-down version of the computer system used in-house by the National Program to provide technical assistance to states and compacts, and to research management topics prior to preparing the technical report.

For more, "LLW Management Information is Available on the WEB," pg.42, Nuclear News, July 1996.
