

What's New On ACEFAX

(This list was last updated on January 22, 1998)

General Documents

- 9 What's New On ACEFAX (7 Pages)
- 10 ALARA Notes No.13
- 12 List Of Documents On ACEFAX (29 Pages)
- 15 Dollar Worth Of A Person-Rem For U.S. Utilities (1 Page)
- 23 Subject Index For Processes Database (4 Pages)
- 24 Subject Index For Practices Database (1 Page)
- 25 Subject Index For Jobs Database (1 Page)
- 26 Subject Index For Health Physics Technology Database (2 Pages)
- 27 Subject Index For Research Database (4 Pages)
- 28 Subject Index For News Database (6 Pages)
- 29 Subject Index For ALARA Handbook Database (1 Page)
- 30 Collective Dose And Electricity Produced: U.S. Nuclear Power Plants (1 Page)
- 31 List Of Documents For Processes Database (2 Pages)
- 32 List Of Documents For Practices Database (1 Page)
- 33 List Of Documents For Jobs Database (1 Page)
- 34 List Of Documents For Health Physics Technology Database (2 Pages)
- 35 List Of Documents For Research Database (2 Pages)
- 36 List Of Documents For News Database (9 Pages)
- 37 List Of Documents Of The Third International Workshop On ALARA
Implementation Of ALARA At Nuclear Power Plants (3 Pages)
- 38 List Of ALARA Center Publications (6 Pages)
- 39 Enhancing ALARA And Reducing Costs: The Future Of Robotics (6 Pages)
- 40 Address For Obtaining The Proceedings Of The Third International Workshop On
Implementation Of ALARA At Nuclear Power Plants (1 Page)
- 41 Prevention Of Heat Stress During Radiological Work (8 Pages)
- 42 Korea Goes As Low As Reasonably Achievable (2 Pages)
- 43 ALARA Center Promotes Good Practice In The USA (1 Page)
- 44 Recommendations Concerning The Reduction In The Use Of Respirators (4 Pages)
- 45 A Questionnaire On Heat Stress (6 Pages)
- 46 List Of Contacts Of Utility Radiological Protection Personnel (16 Pages)

DOE Section

- 8001 Vitrification Of Low-Level Radioactive Waste
- 8002 Spent Resin Disposition - Available Alternatives And Selection
- 8003 Westinghouse Unveils WES Strip

- 8046 Avoid The Unexpected: Use A 3D Cad Model Before Building Or Maintenance
- 8047 Demonstrating Practical Achievements In Radwaste Management
- 8048 Foreign Research Reactor To Return Spent Fuel To U.S.
- 8049 Decontamination And Decommissioning

News Database

- 3389 Safety Assessment
- 3390 Capacity Factor
- 3391 Good Marks
- 3392 Steam Generator Changeout
- 3393 Refueling Record
- 3394 Videoimagescope
- 3395 IAEA
- 3396 New Products - Valve Packing Technology
- 3397 Inspection Tool
- 3398 Air Pilot Valves
- 3399 Radiation Counter
- 3400 Pump Maintenance/Repair
- 3401 Video Measurement System
- 3402 Inspection Service
- 3403 Condenser Cleaning
- 3404 Document Management
- 3405 Plutonium Assay
- 3406 Regulatory Library
- 3407 Chemical Decons
- 3408 Application Of The Telbot Robot In Hazardous Environments
- 3409 LWR Occupational Dose Data For 1995
- 3410 Proceedings: 1996 ASME/EPRI Radwaste Workshop
- 3411 Interim On-Site Storage Of Low Level Waste: Guidelines For Extended Storage
- 3412 Effect Of Injection Of Depleted Zinc On Radiation Fields Of LaSalle 1 BWR
- 3413 Controlling Radiation Fields At Monticello BWR When Using Hydrogen Water Chemistry
- 3414 Calvert Cliffs: Using PSAs To Assess On-Line Maintenance Risks
- 3415 South Texas: PSA Techniques Used In Day-To Day Activities

- 3424 Evaluation Of The Key Factors Analysis Technique As An ALARA Tool
- 3425 Evaluation Of PWR Radiation Fields: 1991-1996
- 3426 Cycle Chemistry Improvement Program
- 3427 Proceedings: EPRI/DOE International Conference On Managing Hazardous And Particulate Air Pollutants
- 3428 Evaluation Of Alternate Filter Elements For Condensate Polishing Applications At Catawba Nuclear Station
- 3429 Users Manual, Wastecost: Wet Module, Version 1.0
- 3430 French Optimizing Outage Time, Doses In Steam Generator Replacements
- 3431 French Ministries Order New Study Of Leukemia Cases Near La Hague
- 3432 Dose In 90 Days Before Conception Meant More Boys Born At Sellafield
- 3433 France May Ban Temporary Workers From Radiation Work At EDF Plants
- 3434 Instruction Concerning Risks From Occupational Radiation Exposure
- 3435 NRC Taking A New Look At Safety Issues
- 3436 Notes on 1997 International ALARA Symposium, Orlando, Florida, March 16-20, 1997
- 3437 Taking The Chemistry Out Of Chemical Decontamination
- 3438 Steam Generator Feeding Modification ALARA
- 3439 Steam Generator Replacement Ringhals 3, 195
- 3440 A Radiation Protection Approach To The Implementation Of Work Management
- 3441 Computer Based Training - "Radiation Protection"- An ALARA Training Tool
- 3442 ALARA Considerations For PWR Reactor Vessel Annealing
- 3443 Work Management In The Nuclear Power Industry
- 3444 Objective Control In Dose Management
- 3445 Becoming A World Class ALARA Performer With EPRI Technology
- 3446 Achieving Short Outages And Low Doses
- 3447 ALARA Program In The New Generation Of Advanced BWRs
- 3448 Management For The Optimization Of Radiation Exposure In Spanish Nuclear Power Plants
- 3449 Maintaining Public Dose ALARA After Decommissioning
- 3450 Effect Of Hydrogen Water Chemistry On Chemical Decontamination
- 3451 A Radiation Protection Approach To The Implementation Of Work Management
- 3452 A New Water Chemistry Control Method For Radiation Reduction Of BWR
- 3453 The S.R.T. Project: Mobile Robots For Inspection In Nuclear Power Plants
- 3454 The Management Of Radiation Protection In EDF Nuclear Power Plants
- 3455 Electricite De France ALARA Project
- 3456 Achieving Short Outages And Low Dose
- 3457 Integrated Electrometer Dosimeter And Dose Records Systems
- 3458 Automated Health Physics Monitoring
- 3459 Remote Area Monitoring Industry Overview
- 3460 PWR Shutdown Chemistry Control During Short Duration Outages
- 3461 Property Damage Risk Assessment Scoping Study
- 3462 PISCES: Power Plant Chemical Assessment Model - Version 2.0
- 3463 Analysis of Steam Generator Tubing from Oconee Unit 1 Nuclear Station
- 3464 Waste Accounting
- 3465 Decontamination of BWR Systems Using NP/LOMI Preoxidation Steps

- 3466 ANS/UMRUG Meeting on Robotics
- 3467 Steam Generator Inspection and Cleaning: UBIB & UBHC
- 3468 Networking Protocol
- 3469 Conference on Interactin of Non-Iron-Based Materials with Water and Steam
- 3470 Recommendations for an Effective Flow Accelerated Corrosion Program
- 3471 PWR Secondary Water Chemistry Guidelines Revision 4
- 3472 State-of-the-Art Weld Repair Technology for High Temperature and Pressure Parts. Volume 3: Turbine Casing, Piping, and Header Utility Survey, Vendor Survey, and Bibliography
- 3473 Proceedings: Specialist Meeting on Environmental Degradation of Alloy 600
- 3474 WASTECOST Handbook
- 3475 Full System Decontamination of Indian Point 2 PWR
- 3476 Chemical Decontamination with Preoxidation Steps: BWR Sytems at Plant Hatch
- 3477 Experience with Depleted Zinc Oxide Injection in BWRs
- 3478 Study on High Temperature Chemical Cleaning Tests and Applications
- 3479 Steam Generator Tube Fatigue Evaluation
- 3480 Condensate Polishing Guidelines
- 3481 Permanent Lead Shielding for Nuclear Safety Piping Systems
- 3482 Analysis of Steam Generator Tubing from Crystal River, Unit 3
- 3483 Operating Limits for Silica, Cadmium,Aluminum, and Magnesium in PWRs
- 3484 Plant-Specific Optimization of LWR Water Chemistry
- 3485 PWR Fuel-in Full Reactor Coolant System Decontamination Qualification
- 3486 Impact of PWR Primary Chemistry on Corrosion Product Deposition on Fuel Cladding Surfaces

Health Physics Database

- 217 Assessment Of Effective Dose Equivalent For External Photon Radiation
- 218 Total Worker Risk Minimization
- 219 Assessment Of Future Role Of Radiation Protection
- 220 Preventive Measures For Radiation Injury Litigation
- 221 Effects Of Respirators On Worker Efficiency
- 222 Analysis Of Radiation Protection Trends In The Nuclear Power Industry
- 223 Permanent Shielding Design And Installation For Dresden Unit 2

Research Database

- 1408 Cost Effective Radiation Exposure Control
- 1409 Full Reactor Coolant System Chemical Decontamination - National Demonstration
- 1410 Role Of Hydrogen Water Chemistry On Dose Rates
- 1411 Cobalt Source Reduction
- 1412 Experience With Hydrogen Water Chemistry At Brunswick Units 1 And 2
- 1413 Radiation Field Control At Susquehanna BWR

- 1414 A Model For Corrosion Product Transport In BWRs
- 1415 Depleted Zinc Oxide Addition For BWRs
- 1416 Investigation Of Increased Radiation Levels From Utilization Of Hydrogen Water Chemistry In BWRs
- 1417 Water Chemistry And Corrosion Effects On Activity Buildup In BWRs Operating With Hydrogen Water Chemistry
- 1418 Preparation For Field Application Of Full System Decontamination At Indian Point 2
- 1419 Chemical Results Of Full System Decontamination At Indian Point 2
- 1420 Lessons Learned From Full Reactor Coolant System Chemical Decontamination Of A PWR
- 1421 Maine Yankee Loop Stop To Loop Stop Chemical Decontamination
- 1422 DERAD - A Decommissioning Economic Risk Advisor: Software To Analyze Decommissioning Strategies
- 1423 Projected Cost Benefit For Full System Chemical Decontamination Projects
- 1424 Field Experience With Full System Chemical Decontamination Of BWR And PWR Type Reactors Using The Cord Process
- 1425 Fuel-In Reactor Coolant System Chemical Decontamination Program
- 1426 Dose Rate Trends In Siemens-Designed PWRs
- 1427 Dose Rate Trends In Siemens-Designed BWRs
- 1428 Dose Rate Trends In Westinghouse-Designed PWRs
- 1429 Improved Method For Measuring The Effectiveness Of Radiation Field Control Techniques
- 1430 Effect Of Various Processes On BWR Dose Rates
- 1431 Effect Of VVER Water Chemistry On Dose Rate
- 1432 Effects And Shut-Down Criteria
- 1433 Development Of The CAN-DEREM Plus Reagent For Fill And Drain Decontamination Of Reactor Components
- 1434 Chemical Decontamination For Decommissioning
- 1435 Selchem: A Novel Decontamination Process
- 1436 Vanadium Analysis During LOMI Decontamination
- 1437 Recent Experience With Chemical Decontamination
- 1438 Westinghouse Recent Chemical Decontamination Experience
- 1439 Effect Of Hydrogen Water Chemistry On Chemical Decontamination
- 1440 Utility Chemical Decontamination Experience At Commonwealth Edison's Boiling Water Reactors
- 1441 Assessment Of Alternative Oxidizing Reagents For Conditioning BWR And PWR Oxides
- 1442 Reactor Vessel Decontamination And Other Dose Reduction Initiatives At The Oskarshamn
- 1443 Selection Of The Oxidation Step In Chemical Decontamination
- 1444 Advances In Welding Iron-Base NOREM Hardfacing Alloys
- 1445 Development Of Cobalt-Free Wear-Resistant Alloys For Nuclear Applications
- 1446 Cobalt Balance Measurements At Ringhals-1 BWR
- 1447 Coupon Exposure Studies At Doel-2 Using Stabilized Chromium Surface

Pretreatment

- 1448 Optimizing BWR Control Rod Blade Management Strategies
- 1449 PWR Primary Water Chemistry Guidelines - Revision 3
- 1450 PWR Dose Reduction Measures At Millstone Point-2
- 1451 Elevated pH Coolant Chemistry Control At Millstone Point-3
- 1452 Effect On Zircaloy Clad Corrosion Of Elevated Lithium Operation At The Millstone 3 PWR
- 1453 PWR Zinc Injection Experience At Farley Unit 2
- 1454 High Pressure Water Spraying For Boiler Head Decontamination
- 1455 Decontamination Of Ontario Hydro Pickering Unit 1 Steam Generators

ALARA Handbook Database

- 7000 NRC Regulatory Dose Limits
- 7001 Air And Effluent Concentration Limits
- 7002 Administrative Limits
- 7003 ICRP And NCRP Recommendations On Dose Limits
- 7004 Removable Contamination Limits For Packing And Transportation
- 7005 Checklist For Radiological Hazards
- 7006 Probable Effects Of Acute Whole Body Doses
- 7007 Control Of External Radiation Exposure
- 7008 Absorption Of Beta Radiation: E(Max)=1Mev
- 7009 Internal Radiation Hazards
- 7010 Internal Dose
