Nuclear Utility Meteorological Data Users Group Meeting

Sheraton University Hotel & Conference Center

Syracuse, New York

May 12 – 14, 1999

PURPOSE

To provide a forum to address problems and exchange ideas for those collecting and utilizing meteorological data at nuclear facilities. A variety of presentations covering such topics as meteorological instrumentation, data collection techniques, quality assurance, and emergency preparedness will be delivered. In addition, a discussion concerning status of proposed meteorological standard ANSI/ANS 3.11 (currently 2.5) will be held. A copy of the draft standard is included.
