

## YOUR WIND MEASUREMENT SOLUTIONS PARTNER

Providing custom configured or off-the-shelf sensors and systems that deliver data you can rely on... even in the harshest environments.

From Alaska to New Zealand, our customers rely on us for proven, accurate and reliable wind and other surface meteorological measurements. Sensors for any application: from classic mechanical cup and vane sensors to no-moving part sonic anemometers – all traceable to NIST standards.

- **Dependable service** • **Reliable installation**
- **Professional training** • **Technical support**

Also, rapid in-house calibration and replacement part turnaround. We are there for you when and where you need us most!

**Serving the Commercial, Industrial/Power Generation, Military and R&D Markets for over 35 years.**
