

Biography for John Ciolek (Si O lek)

John has a Bachelor of Science degree in physics from Case Western Reserve University and a Masters of Science degree in atmospheric science from Colorado State University. He is currently a senior atmospheric scientist at AlphaTRAC, Inc. in Westminster, Colorado. He is the primary author of the CAPARS real-time emergency response atmospheric modeling system and chairman of the ANSI/ANS 2.15, 2.16, and 3.8.10 working groups. John has been involved with emergency response consequence assessment within the U.S. Department of Energy since 1988 developing response organizations, tools, training programs, validation projects, quality assurance programs, exercises, and participating in event response. John loves to ski and play the drums (but not at the same time).
