

Speaker Bio for Theodore A. Messier

Mr. Messier has degrees in meteorology from the University of Lowell and the Pennsylvania State University. He has worked in the commercial nuclear power industry since 1989 and is employed by AREVA NP Inc. in their Radiological & Environmental Analysis group. He has determined atmospheric dispersion factors for design basis accident and routine release scenarios, certified meteorological data, provided annual data summaries for submission to the NRC, developed the meteorology and air quality sections for two uranium enrichment facility license applications and for the environmental report for three U.S. EPR nuclear power plants, and participates in the preparation of both RETS and REMP annual reports for AREVA clients.
