

Abstract for:

RETS/REMP Meeting , OakBrook Illinois

Dates : June 29-30, 2011

Title: Acceptance Criteria for the Analysis of Performance Testing Samples for Effluent and Environmental Programs-Revisited

Presented by: Daniel M. Montgomery, Ph.D, Consultant to Eckert and Ziegler Analytics

Eckert and Ziegler Analytics has provided performance testing samples for effluent(hot crosscheck program) and environmental monitoring programs at nuclear power plants for more than 25 years. The purpose of this session is to solicit comments from participants in these programs with respect to proposed new acceptance criteria. The history and rationale of current acceptance criteria will be discussed. New acceptance criteria for both programs will be proposed with an open session for comments and questions from the audience.
