

Demonstrating Compliance with 40CFR190 in PWR Annual Reports, RG 1.21

John Doroski – Entergy Nuclear, Indian Point (IPEC)
Steve Sandike – EnvoNuTek, LLC

ABSTRACT

Review of the 2012 Annual Radiological Effluent Release Reports (ARERRs) for PWRs indicates substantial variations on the methods of demonstrating compliance with 40CFR190. This presentation:

- Highlights the requirements for documenting this information in the ARERR
- Shows where we are today in implementing this requirement
- Provides some suggestions for improvement

Since shine dose can be a significant contributor to offsite doses, it may be appropriate to implement these suggestions.

Paper presented at the 24th Annual RETS/REMP Workshop, June 24-26, 2014, Savannah, GA.
